

# Investing in Tanzania's Fisheries Industry: A Lucrative Opportunity

Tanzania's deep-sea fishing industry presents an exciting investment opportunity, thanks to its abundant marine ecosystem and tax incentives. With 1,424 kilometers of shoreline and a strategic location along major shipping routes, the country offers easy access to international markets. Moreover, the government is committed to infrastructure improvement, pledging to invest significantly in port and processing facilities for fishing products.

## **Multi-Purpose Vessels for Deep Sea Fishing | Call for Investment**

TAFICO is investing in a fishing harbor, complete with cutting-edge facilities. The harbor is strategically located to attract traffic from coastal and offshore fisheries, establishing a vital link that connects fishing port operations to global fish marketing networks.

## **Open for Joint Investment: Supporting Artisanal Fisheries through Private-Public Partnerships (PPP)**

We are pleased to announce that we are accepting joint investments through private-public partnerships (PPP) to support artisanal fisheries with the installation of fish aggregating devices (FADs).

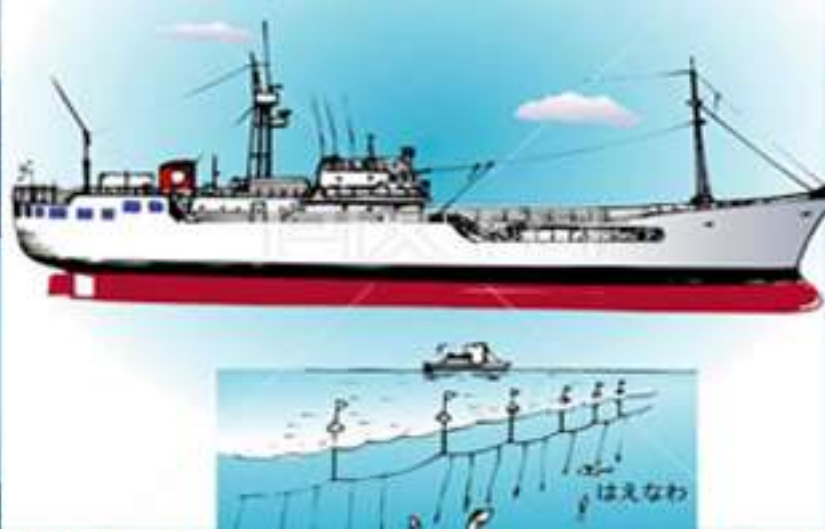

## **Exciting Joint Venture Opportunity: Cold Storage and Ice Plant Project in Dar es Salaam**

Our corporation is strategically located in Dar es Salaam and we have an amazing new project in the pipeline. We are seeking a Joint Venture partner for a Cold Storage and Ice Plant venture.

## **Construction of Fish Feeds Plant**

Tanzania boasts approximately 14,100 freshwater fishponds located across its mainland. As one of Africa's primary aquaculture nations, fish farming plays a vital role in Tanzania's economy. Consequently, there is an increasing need for high-quality fish feed due to the country's growing demand.

## Sardine and Small Pelagic Fish Processing Facility

The Small Pelagic Fishery in Tanzania is of utmost importance in the country, providing a significant but possibly underestimated contribution to the food security and livelihoods of coastal communities.

## The Rise of Fish Farming: A Growing Industry

Fish farming is a growing trend, with 14,100 earthen fishponds in operation. In Tanzania, most farmed tilapia species are produced using extensive or semi-intensive methods in ponds, tanks, hapas or cages, and are fed with locally available feed ingredients.

## Investing in Quality Fish Fry Production

TAFICO: provides profitable Opportunity to Invest in Quality Fish Fry as Tanzania's Fish Farming Industry Blossoms

## See Weed Processing
